

The UltraMito Pet Life 2.0

Get back what you had before and more!

UltraMito Pet Life 2.0 is a second generation product for pets in the *UltraMito* line of mitochondria-related products. It utilizes the same breakthrough technology found in the highly successful *UltraMito Restore* product for people. Just0 formulated specifically for pets by scientist and formulator Dr. Bevan Elliott to help pets live long, healthy and energetic lives.

Informed by his background in nanotechnology, physics and emerging science, he created a new proprietary technology designed to potentiate the mitochondria. Mitochondria are the components in cells that produce energy and are involved in, virtually, every significant cellular function in the body.

Dr. Elliott's research indicates that what affects health the most is the health of the mitochondria. Pets literally can't be there healthiest unless their mitochondria are at their best. If the health of the mitochondria is improved and there are more mitochondria, that are bigger and more energetic, overall health can be improved.

UltraMito Pet Life 2.0 is designed to work in concert with *UltraMito Rejuvenate*. While *UltraMito Pet Life 2.0* works from the inside out, *UltraMito Rejuvenate 2.0* works from the outside in allowing specific areas of concern to be addressed.

About *UltraMito Pet Life 2.0*

UltraMito Pet Life 2.0 is highly recommended for daily use with pets of all ages. It uses natural ingredients that are amplified and driven deep into cells and into mitochondria using proprietary XDS (eXponential Delivery System) technology.

Why is this important? Because to have the very best results, great natural ingredients alone are not good enough. The natural bioactive ingredients, typically, contained in nutritional supplements can have poor deliverability and don't easily get to where they need to go, to do the most good.

XDS formulations rectify this problem in a powerful way. It typically uses only a fraction of the normal daily dose for a given ingredient, compared to how much of the same ingredient is commonly used in other nutritional supplement formulations. Yet XDS is so effective that much greater benefits can result. Nutrients tend to work faster and with much greater results for more people.

The benefits of *Pet Life* can be especially important to pet owners who want their pets to:

- Have healthier litters
- Have healthier skin and coats
- Be more energetic and mobile
- Recover more quickly from injury and sickness
- Live as long and as healthy a life as possible with less emotional stress and discomfort

Pets bring us so much joy. *Pet Life 2.0* was created to help us enjoy them for as long as possible.

How should UltraMito *Pet Life 2.0* be used?

UltraMito Pet Life 2.0 can be given alone or on food. Administer according to the table below:

SIZE	WEIGHT [Lbs]	DOSE [ml]
Small	0-40	1
Medium	41-80	2
Large	>80	3

What should I expect and how quickly does it work?

For some issues results can be seen within minutes. Others issues will show results over time especially depending upon how much detoxification needs to be done.

Owners whose Pets have complex health situations should be patient. The conventional wisdom is to allow at least three months to give any nutraceutical a fair test.
